M46

Ready for your mission.

Patrol. Security. Response. Maritime support.

ONE PLATFORM. YOUR OPERATING REQUIREMENT.

NAE helps define the vessel configuration, technical scope and delivery plan around the work your team needs to perform at sea.

Define the mission. Shape the platform.

Coastal operations demand a clear balance of crew, equipment and propulsion. Start with the operating profile, then develop the configuration.

PATROL & SURVEILLANCE

Coastguard, customs and maritime intelligence missions. Define the operating area, watch cycle and observation requirements.

SECURITY & PROTECTION

Offshore asset protection and personnel deployment. Align crew accommodation and mission equipment with the task.

SEARCH & RESPONSE

Search and rescue, diving support and firefighting. Establish the support equipment and deck-space requirements.

MARITIME SUPPORT

Specify boarding, communications and handling needs early so the technical and commercial scope stays aligned.

M46 / PLATFORM DATA

The numbers behind the configuration.

Length	13.99-14.75 m
Beam	4.20 m
Project draft	0.39 m
Speed range	40-70 knots
Fuel capacity	1,000-2,000 L
Displacement	7,300-9,990 kg
Stated carrying capacity	10,000 kg

Aramid-reinforced hull and deck. Vacuum-infusion construction.

Values vary by configuration. Carrying-capacity and payload definitions require confirmation. Final dimensions, draft, loading and performance are established during technical review.

Specify the vessel. Coordinate the program.

CONFIGURATION CHOICES

Open or cabin layouts; manned or unmanned concepts. Crew spaces and mission equipment are defined for the selected configuration.

OUTBOARD	WATERJET	SURFACE DRIVE
3 x 225-600 hp	**2 x 440-600 hp**	**2 x 440-800 hp**

NAE coordinates requirements, configuration review, supplier engagement, technical documentation, commercial discussions and delivery planning.
